About Me

Enthusiastic first-year Computer Science and Engineering student at the University of Lucknow with a strong foundation in full-stack web development, Python data science, and modern AI tooling. Passionate about building clean, efficient software and eager to contribute to real-world projects through internships and open-source collaboration.

Education

Bachelor of Technology — Computer Science & Engineering

2025 — 2029

University of Lucknow, Lucknow, Uttar Pradesh

Second Year

Higher Secondary (XII) — Science (PCM + CS)

2024

Heritage International Public School, Kasia, Kushinagar, Uttar Pradesh

84.6%

Secondary (X)

2022

Heritage International Public School, Kasia, Kushinagar, Uttar Pradesh

86%

Technical Skills

Frontend

HTML5 CSS3 Tailwind CSS JavaScript (ES6+) React.js Next.js

Backend

Node.js Next.js FastAPI REST APIs

Database

MongoDB MySQL

Python

Python NumPy Pandas Matplotlib

AI / ML

AI Fundamentals Machine Learning scikit-learn TensorFlow Prompt Engineering

Tools

Git & GitHub VS Code Vercel Linux CLI L^AT_EX

Projects

RepoRaft — Community Resource Hub [🔗 reporaft.vercel.app](https://reporaft.vercel.app)

2025

Next.js, React.js, Tailwind CSS, Node.js, Vercel

- Built a full-stack community platform where students discover and share the best tutorials, GitHub repos, PDFs, and courses — organised by topic and ranked by upvotes.
- Implemented category-based filtering (Web Dev, ML, DSA, etc.), a community upvoting system, and user authentication via NextAuth.
- Designed a clean, responsive UI with Tailwind CSS and deployed on Vercel with zero-downtime CI/CD.

CalPrice Analytics — California Housing Price Predictor [🔗 calprice.vercel.app](https://calprice.vercel.app)

2026

Next.js, React.js, Python, FastAPI, scikit-learn, Pandas, NumPy, Vercel

- Built a full-stack machine learning web app that predicts California median house prices using a Random Forest Regressor trained on the 20,640-record StatLib California housing dataset, achieving 94.2% R² accuracy.
- Engineered a FastAPI backend exposing a `/predict` endpoint for real-time inference, with Pandas/NumPy/scikit-learn handling imputation, scaling, and categorical encoding.
- Built an interactive Next.js frontend with adjustable input parameters (income, rooms, location, ocean proximity), live confidence intervals, feature-importance breakdown, and a searchable dataset explorer.

Achievements & Activities

- Active contributor to open-source repositories on GitHub.
- Participated in college-level coding competitions and hackathons.
- Member of the University CSE Tech Club, attending workshops on web and AI.
- Self-taught full-stack skills through online platforms (freeCodeCamp, Udemy, YouTube).
